European architect-grade product from the house of

vivre PANELS

MANUFACTURING PROCESS

- Refining raw wood fibres for quality.
- Gluing, pressing & calibrating into uniform panels.
- Routing wooden panels into desired designs.
- Applying textured PVC finishes on top layer.

SPECIFICATIONS

CORE: Engineered Wood
(HMR-Grade MDF)

FINISH: Textured PVC Membrane

HEIGHT: 9ft (2750mm)

WIDTH 121mm (4.75 inches)

THICKNESS: 18mm (3/4th inch)

PROFILES

A large log is being processed by a sawmill. The log is positioned horizontally, and a large metal blade is visible above it, cutting through the wood. A thick spray of wood shavings is being ejected from the mill, filling the air. The background shows a dense forest of green trees. The scene is captured in a close-up, slightly low-angle shot, emphasizing the scale of the machinery and the volume of wood being processed.

602 MATT
BELLA GOLD

An aerial photograph of a construction site during a concrete pour. A large, dark grey concrete slab is being laid out on a reddish-brown dirt surface. Two workers in high-visibility vests and hard hats are visible near the edge of the concrete. A concrete pump truck is positioned on the right side of the frame, with its chute extending towards the concrete. The scene is captured from a high angle, showing the texture of the concrete and the surrounding earth.

INSTALLATION

- Panel the wall with either aluminum channels or plywood as the base
- Fixing the panel: Drill screws on the lower side of the 1st panel at intermitted distance
- Overlap the upper side of the 2nd panel on the 1st panel
- Again drill the screws on the lower side of the 2nd panel
- As we repeat the process, screws are hidden & we achieve perfectly consistent panelling
